

Challenge #5: Implementation of head tags

Inside of the head tag I put title, and link for icon and styles. See in figure 1.

Figure 1

```
1 <!DOCTYPE html>
2 <head>
3   <title>M'LANG</title>
4   <link rel="icon" href="Image/ico.ico">
5   <link rel="stylesheet" href="style.css">
6   <link href='https://unpkg.com/boxicons@2.1.4/css/boxicons.min.css' rel='stylesheet'>
7 </head>
```

In head tag I will add a link for my script, for now I'm learning it. According to w3school

The HTML <head> element is a container for the following elements: <title>, <style>, <meta>, <link>, <script>, and <base>. But for now I use only the link and title tags.
