

## Challenge #4: Implementation of Favicon

Base on the w3school this is the syntax of putting a fav icon on your website. See the figure 1 bellow.

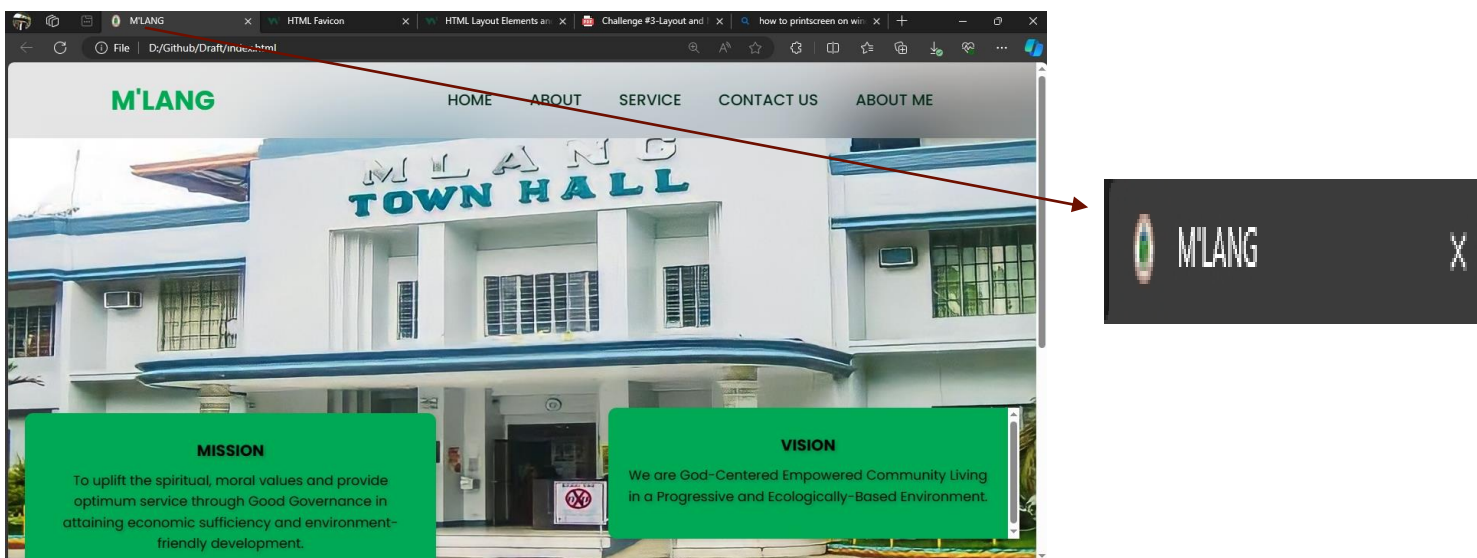

Figure 1

```
1 <!DOCTYPE html>
2 <html>
3   <head>
4     <title>M' LANG</title>
5     <link rel="icon" href="Image/ico.ico">
6     <link rel="stylesheet" href="style.css">
7     <link href="https://unpkg.com/boxicons@2.1.4/css/boxicons.min.css" rel="stylesheet">
8   </head>
9   <body>
10    <header class="header">
11      <a href="index.html" class="logo">M' LANG</a>
12
13      <input type="checkbox" id="check">
14      <label for="check" class="icon">
15        <i class='bx bx-menu' id="menu-icon"></i>
16        <i class = "bx bx-x" id="close-icon"></i>
17      </label>
18
19      <nav class="navbar">
20        <a href="index.html" style="--i:0;">HOME</a>
21        <a href="about.html" style="--i:1;">ABOUT</a>
22        <a href="service.html" style="--i:2;">SERVICE</a>
23        <a href="contact-us.html" style="--i:3;">CONTACT US</a>
24        <a href="about-me" style="--i:4;">ABOUT ME</a>
25      </nav>
26    </header>
27    <section>
```

Here I also import a fav icon on online, the "i" tag use to access the icon on icon library.

Figure 1.2

This is the output a beautiful icon on your page. See the figure 1.2.
